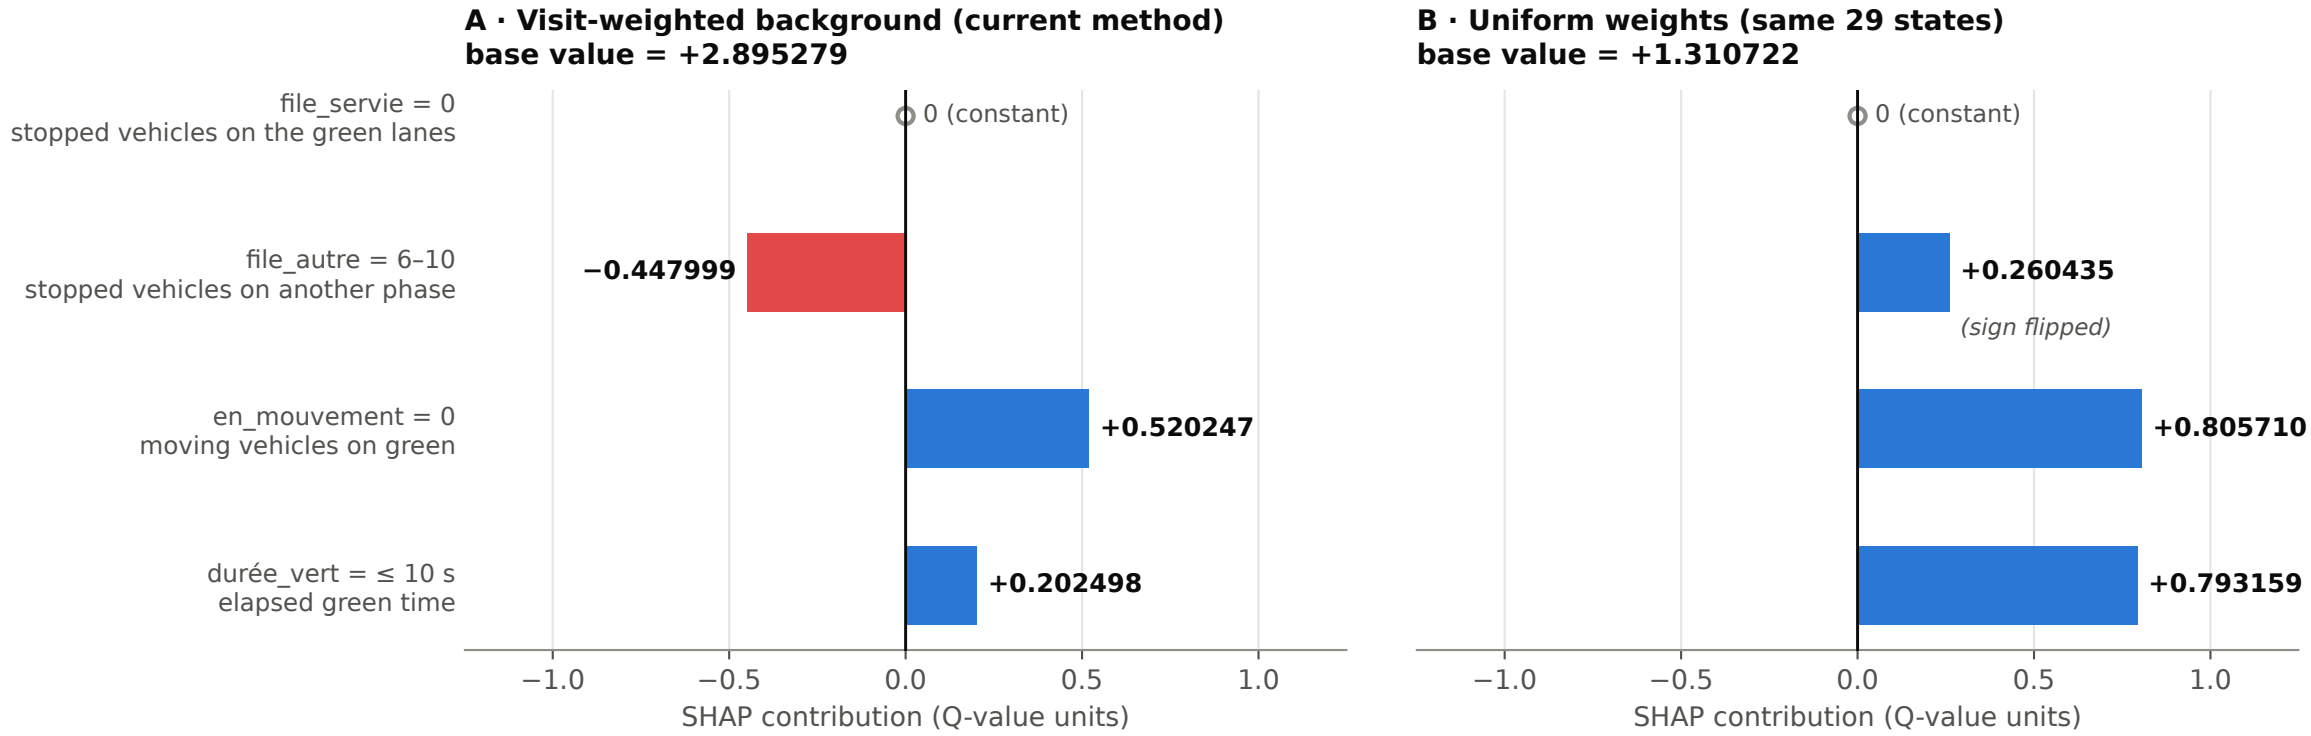
Exact SHAP contributions to Δ = Q(switch) − Q(keep) = +3.170026

S3 (tabular Q-learning) · signal -29958 · 07:29:01 · decision "switch" · SUMO simulated data (LuST Kirchberg)

Positive: pushes towards "switch" Negative: pushes towards "keep"



file_servie is constant in the 29 retained states: its contribution is zero by construction, which does not prove the variable has no effect.

22 of the 29 retained states have unreliable Q-values (fewer than 3 visits).
